

Migrating Your Data from Drobo FS to DroboPro FS

Moving your data from Drobo FS to a DroboPro FS is simple.

The disk packs are directly transferrable between the Drobo FS and the DroboPro FS.

1. Ensure that the DroboPro FS is updated to the latest version of firmware by "checking for updates" within Drobo Dashboard.
2. Put both your Drobo FS and DroboPro FS into standby using Drobo Dashboard or your operating system and then power off each array.
3. Remove ALL disks from Drobo FS and insert ALL disks into DroboPro FS.
4. Power DroboPro FS back on.
