## VERSION INFORMATION

---

Drobo Firmware: Version 1.3.6 [1.253.25784]

## KEY HIGHLIGHTS

---

This is a release for the First and Second Generation Drobo Firmware.

- **Fixed support for new 4K sector drives**

## BEST PRACTICES

---

In accordance with industry best practices, you should always backup your data before any firmware upgrade. For more information please visit [www.drobo.com/support](http://www.drobo.com/support).

## KNOWN ISSUES

---

### Macintosh Specific

- **Symptom:** Non-destructive repartitioning is not supported.  
**Condition:** In Mac OS 10.5 and later, Disk Utility allows you to repartition a volume without losing the data on it. Drobo volumes do not support this functionality and should not be repartitioned once data has been placed on them.  
**Workaround:** Copy your data onto another drive and use Drobo Dashboard to reformat your Drobo's volume to a smaller size.

### Windows Vista Specific

- **Symptom:** Full format does not complete with Windows Vista (#10-651).  
**Condition:** Drobo will not support a full format from Vista for a volume bigger than the space available.  
**Workaround:** Choose the quick format option if you use Windows Vista to format Drobo.

## Windows Server 2003 Specific

- **Symptom:** Drobo formatted as FAT32 not recognized by Windows Server 2003 (#10-496).  
**Condition:** If Drobo is formatted in FAT32 using the Drobo Dashboard or a different OS, such as XP, Windows Server 2003 does not recognize the FAT32 volume.  
**Workaround:** Use the Disk Manager OS utility on Windows Server 2003 to manually assign the FAT32 volume a drive letter.
